IEG PI NOTICE

No. 15-76

TITLE/SIGNIFICANCE:

Comparison of Ballistic Missile and Cruise Missile Railcars, China

COMMENT: The railcars associated with ballistic missile shipping may consist of two covered railcars (appear to be passenger cars) separated by a flatbed railcar. The railcars associated with cruise missiles consist of two long covered railcars, but are separated by a flatbed railcar. The principle difference is the flatbed railcar associated with cruise missile systems. Refer to artist's concept of Cruise Missile Railcars (reverse page).
